SITUATION SUMMARY

October Atmospheric River Event

A series of weather systems (atmospheric river) will bring rain across Northern California through tonight, with some additional lighter rainfall expected over far Northern California on Saturday. Some localized flooding in urban areas is possible with this rain, and localized burn scar debris flow. Widespread rain will develop over all of Northern and Central California on Sunday, gradually spreading into parts of Southern California on Monday. Periods of rain will also persist across Northern California on Tuesday before ending statewide midweek. Rain will be heavy at times, with total precipitation amounts of 2 to 5 inches, and higher amounts of 8 inches or more across the higher mountains, particularly in the Sierra. Rainfall amounts will decrease with southward extent, with 1 to locally 2 inches expected across coastal Southern California.

Please see attached Atmospheric River Event Report for additional information.
